### Task 1 - Listening (2 Points for each correct answer)

*Task Instructions: You will hear a short recording that matches the text on your paper. Fill in the 10 missing words in the underlined gaps with the correct words you hear. Please make sure to use correct singular and plural forms, and correct verb tense where appropriate. The recording will be played twice.*

— Text Start —

On a storm-lashed night in his laboratory, Victor Frankenstein finally achieved what he had pursued with obsessive determination. Months of study, sleepless \_\_\_\_\_ , and reckless ambition culminated in a single moment: the spark of life breathed into lifeless matter. The creature opened its eyes, and Victor, instead of \_\_\_\_\_ , felt horror grip his heart.

The being he had fashioned was enormous, \_\_\_\_\_ , and unnatural. Though its features were formed with precision, the combination of parts produced a face that terrified its creator. Victor fled the chamber, consumed by \_\_\_\_\_ at the reality of his success.

Left \_\_\_\_\_, the Creature wandered into the world, longing for kindness but met with cruelty. Wherever it went, people \_\_\_\_\_ and fled. Its heart, at first innocent, grew bitter with each rejection. Loneliness turned to anger, and anger into \_\_\_\_\_.

When the Creature confronted Victor, its words were \_\_\_\_\_ and filled with sorrow. It begged for companionship, for someone who would not \_\_\_\_\_ in fear. But Victor, torn between responsibility and fear, denied it. This refusal planted the seeds of tragedy, binding creator and creation in a relentless chain of pursuit and revenge.

What began as a vision of human progress became a \_\_\_\_\_ tale of ambition unchecked, and of the terrible cost of playing god.

## Task 2 - Spelling Correction (2 Points for each correct answer)

*Task Instructions: Carefully read the text and find **TEN** misspelled words. Write the correct spelling on the numbered lines below. Please make sure to use correct singular and plural forms, and correct verb tense where appropriate. Answers can be in any order. An example is provided.*

In modernn society, technology has become inseparable from daily life. From smartphones and laptops to artificial intelligent and renewable energy systems, technological innovation is transforming the way we live, work, and communicate. Yet, while these advancement bring undeniable benefits, they also raise complex challenges that cannot be ignore.

One clear advantage of technology is its ability to enhance efficiency. Automated systems streamline production, digital platforms connect people instantly across continents, and medical innovations improve diagnostic and treatment. These developments contribute to economic growth and a higher quality of life for many. Moreover, access to online information has empowered individuals to educate themselves, fostering lifelong learning and global awareness.

However, technology also presents serious drawbacks. Overreliance on digital devices can reduce face-to-face interaction and weaken social bonds. The spread of misinformation online threatens democracy processes, while data breaches compromise privacy and security. In addition, rapid technological change can widen the gap between those who have access to resources and those who do not, creating new forms of inequality.

To address these issues, governments, educators, and companies must collaborate to promote responsible use of technology. Digital literacy should be prioritised in schools, ethical guidelines should regulate emerging industries, and individuals should be encouraged to strike a balance between virtual and real-world experiences.

In conclusion, technology is a double-edged sword: it has the potential to enrich human life, but only if society learns to manage its risks wisely and equitably.

Example: MODERN
